

Your Invitation

A BRAND NEW EXHIBITION dedicated to sensing and measurement for control and instrumentation offering engineers an easy route to see and learn all about the latest products in your industry. Use this exhibition to find and evaluate current industry developments, source new products and services and update your knowledge at FREE workshops presented by key industry experts.

SENSORS+SYSTEMS FOR CONTROL & INSTRUMENTATION

14-15 SEPTEMBER • 2011 • FIVE • FARNBOROUGH

Wednesday & Thursday: 10.00am-4.00pm

sensorsandsystems.co.uk

pre-register online to receive your advance e-badge and to reserve your FREE Workshop place

FREE Workshop Programme

Wednesday 14th September

- 2D laser scanner with integrated Ethernet for automated inspection and process control **Micro-Epsilon**
- Becoming Wireless **Honeywell Control Systems Ltd**
- MEMS Accelerometers for industry and instrumentation **Colybris (Switzerland) Ltd**
- Cables - The Weakest Link? **Igus (UK) Ltd**
- Intelligent Networks **Adsyst (Automation) Ltd**
- Piezoelectric transducers/Strain Gauge based transducers - a comparison **HBM**
- Harnessing Cloud Computing for data acquisition **National Instruments**
- Strain Gauge Applications in industry with wireless communication and Energy Harvesting **Techni Measure**
- ESP KTN introduction / Introduction to resonant inductive position sensing / Intelligent Sensing Using Multi-Functional Coatings **ESP KTN**
- 5 essential factors to consider when implementing Profibus/Profinet **Profibus Group**
- Automated communications and device monitoring on PROFIBUS networks **Profibus Group**

Thursday 15th September

- 2D laser scanner with integrated Ethernet for automated inspection and process control **Micro-Epsilon**
- Becoming Wireless **Honeywell Control Systems Ltd**
- MEMS Accelerometers for industry & instrumentation **Colybris (Switzerland) Ltd**
- Flow sensors for gases - Possibilities of design and system integration **Burkert Fluid Controls**
- The Measurement Network - building a community of measurement users; and the place for people interested in measurement **NPL**
- Safe fuselage assembly for modern commercial aircraft **HBM**
- Harnessing Cloud Computing for data acquisition **National Instruments**
- Design, selection and applications for Piezoelectric Accelerometers and other Sensors **Techni Measure**
- ESP KTN introduction / The electric potential sensor - technology & applications / A 6-Degree of Freedom Interferometer **ESP KTN**
- PARC - An Introduction to Product Testing for Reliability **PARC**

Full workshop programme including synopses and timings on the web
Workshops are FREE but with limited space reserve your place today

Reserve your FREE workshop place at:
sensorsandsystems.co.uk

Sensors+Systems for Control & Instrumentation will appeal to engineers and designers whose main interests include ...

- | Analytical Instrumentation | Automation equipment
- | Calibration equipment | Condition Monitoring | Control & Actuation
- | Data acquisition & Telemetry | Drives & Motion Control
- | Electrical Power & Protection | Enclosures, Cabling & Connectors
- | Environmental monitoring
- | Hydraulics & Pneumatics | Industrial Networks | Intrinsic safety
- | PC hardware & software | Powerline monitoring
- | Predictive Maintenance | QC/QA | Recorders & gauges
- | Signal conditioning | Test & Measurement | Valves & process hardware

and who specify sensors for ...

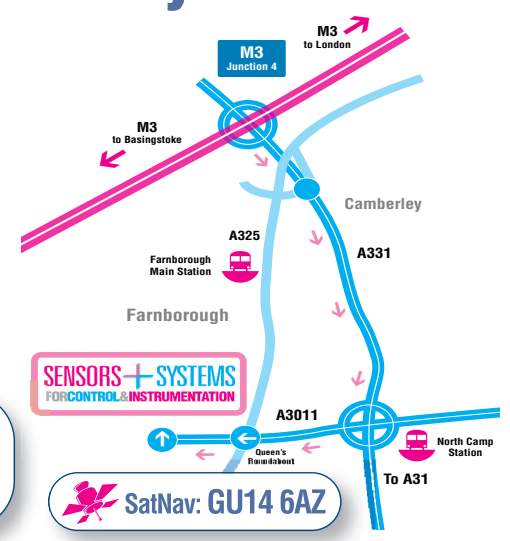

- | Displacement | Flow | Environmental | Level | Load
- | Noise & vibration | Pressure | Temperature | Velocity & acceleration
- | Torque | Humidity

SENSORS+SYSTEMS FOR CONTROL & INSTRUMENTATION

14-15 September, 2011, Wednesday & Thursday: 10.00-4.00
FIVE, Farnborough, Hampshire SatNav: GU14 6AZ

- Ample FREE car parking
- FREE shuttle bus from North Camp & Farnborough Main rail stations
- FREE Catalogue
- FREE Workshop entry

Register for your visitor e-ticket at:
sensorsandsystems.co.uk
plus you can reserve a FREE workshop place
