Beamex® MC2: Practicality for calibration

Practicality in calibration. The Beamex® MC2 series includes three different hand-held calibrators for field use: the MC2 Pressure/Electrical Calibrator, the MC2 Temperature/Electrical Calibrator and the MC2 Multifunction Calibrator. The MC2 is a compact-sized and easy-to-use hand-held calibrator. It has a large graphical display, a menu-based interface and full numerical keyboard. Being a Beamex calibrator, MC2 represents the high, uncompromised quality standards evident in other Beamex calibration equipment.

Beamex® MC2-IS: Practical tool for calibration in hazardous environments

The Beamex® MC2-IS Intrinsically Safe Multifunction Calibrator is an ATEX and IECEx certified calibrator designed for use in potentially explosive environments such as offshore platforms, oil refineries, chemical and petrochemical plants where inflammable gases may be present. It connects to almost 20 available Beamex intrinsically safe external pressure modules. The calibrator has a compact size and design.

Beamex® MC2 and Beamex® MC2-IS – a series of 4 different practical calibrators.

The MC2 series includes four different portable calibrators

Features of the MC2 and MC2-IS

Accuracy guaranteed

The Beamex® MC2 and Beamex® MC2-IS calibrators are extremely accurate process calibrators. As proof of this, each MC2 and MC2-IS calibrator is delivered with a traceable, accredited calibration certificate.

Compact and user-friendly

The MC2 and MC2-IS calibrators are compact-sized, lightweight portable calibrators with a large graphical display and multilingual interface. They have a full numerical keyboard. Using the MC2 and MC2-IS is quick and easy.

Robust field calibrator

The MC2 and MC2-IS are robust and made for tough use. The impact protectors and membrane keyboard make them field compatible and weatherproof.

Wide range of configuration possibilities

The MC2 and MC2-IS provide a number of configuration possibilities, such as both internal and external pressure modules. For instance, the MC2-IS connects to almost 20 available Beamex intrinsically safe external pressure modules.

Make it safe with the MC2-IS

The MC2-IS is an intrinsically safe, ATEX and IECEx certified, multifunction calibrator. It is designed for use in potentially explosive environments, such as offshore platforms, oil refineries, chemical and petrochemical plants where inflammable gases may be present.

1) Uncertainty includes reference standard uncertainty, hysteresis, non-linearity, repeatability and typical long-term stability for the mentioned period. (k=2)

2) The internal pressure module's range may also be displayed in absolute pressure if a barometric module is used.

3) The MC2 Calibrator can hold one internal pressure module and the barometric option.

4) The MC2-IS does not have any internal pressure modules, but it does have a barometric option.

All external pressure modules (EXT) are also compatible with Beamex MC4, MC5, MC5-IS and MC5P Calibrators.

2) Specification valid with an excitation current >0.2 mA (0...400 Ω), >0.1 mA (400 ... 4000 Ω)

Standard Accessories

- User guide
- Calibration certificate
- Internal rechargeable NiMH battery pack + battery charger
- Test leads and clips
- USB cable
- Adapter pressure connector - from G1/8" female to G 1/8" male with 60° internal cone (included in MC2-PE and MC2-MF models)
- Product safety information and EC declaration of conformity (included in MC2-IS)

Optional Accessories

- Pressure T-hose
- Soft carrying case
- Connection cable for external pressure modules
- Dry battery cartridge (not in MC2-IS)
- Calibration handpumps
